

## LUBE SKID | LUBE PACK

Heritage Industries LubePack is a highly versatile lube skid designed for easy transport and customizable configurations. It can be mounted side-to-side, stacked, or stand alone, offering full flexibility in how you manage your fluid maintenance. Its compact design and integrated features make it an ideal solution for on-site fluid service, easily fitting into the back of a service truck for rapid deployment.

Designed to fit perfectly in the back of your service truck, van, or pickup, making it ideal for mobile jobs.

# HERITAGE INDUSTRIES

## LUBEPAK STANDARD FEATURES:

### Construction & Design

- **Materials:** All-aluminum construction for lightweight durability.
- **Dimensions:** A compact 36-inch width, allowing the unit to fit easily into the back of a service truck.
- **Portability:** Includes fork pockets and crane pick points for straightforward transport and deployment.
- **Mounting:** Features Unistrut mounting on top of the tanks, providing a flexible platform for attaching additional components like lights, reels, and other accessories.

### Tank Systems

- **Customizable Capacity:** Available with customizable tank capacities and product quantities. The unit shown includes one 100-gallon used oil tank and two 50-gallon new oil tanks, but configurations can vary (25-gallon, 50-gallon, 100-gallon).
- **Modular Design:** LubePacks can be mounted side-by-side, stacked, or used as separate units, providing complete flexibility in setup.
- **Product Flexibility:** Choose the number and type of packs you need, including Used Oil, New Oil, and Electrical packs. You can even provide your own tanks.

### Pumping & Control Systems

- **Used Oil Pack:** Equipped with a double-diaphragm pump, a regulator and gauge, and a manual air valve.
- **New Oil Pack:** Features a 5:1 piston pump, a regulator and gauge, and a manual air valve.
- **Electrical Pack:** Includes a 2000W inverter, electrical switches, 120V outlets, and features for auxiliary battery isolation and disconnect, with options for remote switch operation.

## LUBEPAK OPTIONAL FEATURES:

### Enhanced Functionality

- **Heating:** Optional tank heaters are available to maintain optimal fluid temperature.
- **Quick-Fill:** A quick-fill system can be added for fast and efficient refilling of tanks.
- **Filtration:** Enhance fluid quality with optional inlet and outlet filtration.
- **Safety:** Over-fill protection can be integrated for safe and secure operation.
- **Controls:** A remote switch can be added to operate lighting, pumps, and heaters from a distance.
- **Reel:** An optional air reel is available for convenience and added utility.
